

EMERGENCY AND TRANSPORT VENTILATOR MEDUMAT STANDARD² – WEINMANN EMERGENCY

CHALLENGE

- Small housing shape for connectors with 2 MOPP to ensure increased patient protection and reduce the risk of electric shock for patients and users

SOLUTION

- Standard tight receptacle with larger front nut mountable in small housing
- Increased IP degree of protection by receptacle has been achieved
- Compliance with 2 MOPP according to IEC 60601-1

CUSTOMER BENEFITS

- High flexibility of use
- Easy and safe handling
- Fast availability with product from standard portfolio
- Technical support and expertise
- Resistance to cleaning agents [e.g. neodisher® MediClean forte from Dr. Weigert]

RELIABLE SUPPORT IN CASE OF EMERGENCY RESPONSE

The MEDUMAT Standard² ventilator from WEINMANN Emergency is suitable for a variety of applications, from primary use to intensive care transport or contamination transport. Nevertheless, it is easy, fast and intuitive to use. Thanks to the short start-up time and the quick entry option via the patient's height or the device's emergency mode, therapy can be started immediately. The versatile functions for differentiated ventilation are easy to operate due to the clear menu navigation and therefore guarantee maximum reliability and safety for patient and user in emergencies.

“ ODU has met our demand for maximum reliability and safety, as well as ensuring intuitive and safe handling, by providing an optimal solution that perfectly matches our product.
