

# ODU MEDI-SNAP®

## BREAK-AWAY CONNECTOR-PORTFOLIO

### MAXIMUM FLEXIBILITY

- Standardized solutions based on the ODU MEDI-SNAP® modular system
- Individual configuration of the connector solution:
  - + Fully overmolded for immediate use
  - + Angled / straight version for field assembly

### ROBUSTNESS

- High resistance to a wide range of environmental conditions in medical / industrial applications
- Up to 5.000 mating cycles
- Chemical resistance and sterilizable versions

### FROM A SINGLE SOURCE

- Many years of experience in cable assembly
- One point of contact for the complete system
- Close collaboration with leading cable manufacturers
- Optional laser labelling

## CONFIGURE YOUR INDIVIDUAL BREAK-AWAY CONNECTION!

In many industrial and medical applications, fast availability and flexible connector solutions are becoming increasingly important.

The ODU MEDI-SNAP® with Break-Away function forms the basis for the connection configuration and was specially developed for connections that need to be mated or unmated in a matter of seconds.

In addition to the overmolded standard solutions and an angled version, ODU MEDI-SNAP®

now also offers a straight cap solution that is quick and easy to install and assemble, as well as enabling a wide variety of cable diameters.

In addition, ODU not only selects the cable, but is also gladly to handle the complete assembly of the Break-Away connector, always in accordance with the specification – you get ODU quality from A to Z and profit from the system approach.
