## PRESS RELEASE

Mühldorf, 23-10-19

### **ODU at Compamed Trade fair preview 2023**

Due to growing concerns about infectious diseases, higher life expectancy and expanding markets, medical devices continue to experience increasing demand. Medical device manufacturers face rising manufacturing costs and the technical and regulatory challenges of producing increasingly complex devices. In view of this changed starting position, close cooperation along the entire supply chain is becoming more and more important.

ODU has been a reliable partner in this area for over 80 years and is a leader in the field of medical connectors. Whether it's diagnostics, therapy, operating rooms or patient monitoring, ODU's focus is on continuous performance and high reliability. All customers are supported in the implementation of applicable regulations and standards, including MDR requirements. ODU produces comprehensive technical documentation and has risk and change management and CMR substance management. In this way, complete traceability is guaranteed. In product design, ODU implements the highest standards for patient and user protection (2 MOPP / 2 MOOP) in accordance with IEC 60601-1.

An optimal connection system requires a smooth interaction of connectors, termination technology as well as cables. ODU's process-safe cable assembly enables the combination of data streams, high-current, high voltage, RF signals (coax), media such as air or fluids, and fiber optic. New to the range, for example, is the ODU MEDI-SNAP® in size 3.5, which provides more space for signals while enabling the transmission of power and fluids. Visit ODU at Compamed, the trade fair for high-tech solutions in medical technology in Hall 8A, Booth P19. A team of experts is on site from 13<sup>th</sup> until 16<sup>th</sup> of November to answer your questions.

**ODU Group: global representation with perfect connections**

The ODU Group is one of the world's leading suppliers of connector systems, employing 2,600 people around the world. In addition to its company headquarters in Muehldorf a. Inn (Germany), ODU also has an international distribution network, production and product development sites in Sibiu/Romania, Shanghai/China, Tijuana/Mexico and Camarillo/USA. ODU combines all relevant areas of expertise and key technologies including design and development, machine tooling and special machine construction, injection, stamping, turning, surface technology, assembly and cable assembly. The ODU Group sells its products globally through its sales offices in Austria, China, Denmark, France, Germany, Hong Kong, Italy, Japan, Korea, Romania, Sweden, UK and the US, as well as through numerous international sales partners. ODU connectors ensure a reliable transmission of power, signals, data and media for a variety of demanding applications including medical technology, military and security, automotive, industrial electronics, and test and measurement
