## PRESSINFORMATION

Mühldorf a. Inn, 14.10.2024

### Broad connector portfolio for medical technology [ODU at the Compamed 2024](#)

For the third year in a row, ODU is presenting its high-tech solutions for medical technology at Compamed in Düsseldorf. In **Hall 8a, Stand P19**, visitors can get to know the extensive ODU portfolio and obtain advice on individual system solutions from the experts present. What you can expect:

#### **First look at the new Push-Lock Medical:**

The ODU MAC Push-Lock is already being used in many areas of application thanks to its modularity, compact housing and convenient push-pull locking. At Compamed, ODU is presenting the new version of the tried-and-tested connector tailored to the medical environment.

#### **Revolutionary fiber optic solution:**

The Expanded Beam Performance technology has a new look and is now available in the ODU MINI-SNAP® and ODU MEDI-SNAP® as well as in the modular connectors of the ODU-MAC® White and Silver Line.

For example, the non-magnetic nature of the MEDI-SNAP or the particularly small cross-section of the MINI-SNAP allow the outstanding properties of EBP technology to be used for an even greater variety of special applications.

#### **Circular connector:**

ODU's well-known circular connector solutions can also be seen and felt at Compamed. The versatile ODU MINI-SNAP is characterized by its robust metal housing and already provides secure connections in many medical applications. Of course, the ODU MEDI-SNAP is also a must. The proven plastic connector solution is ideal for many different medical applications thanks to its various specifications, such as

- Sterilizability
- Autoclavability
- EMC shielding
- Contact protection according to IEC 60601-1

The all-rounder is available in both push-pull and break-away versions.

In order to meet the special hygienic and mechanical requirements in medical technology, ODU circular connectors are also available with silicone overmolding as an option.

Visit ODU at the COMPAMED/MEDICA in Düsseldorf. From 11.11.2024 to 14.11.2024, a team of experts will be on site to advise you at our **stand P19 in hall 8a**.

#### **ODU Group: Global representation with perfect connections**

ODU is one of the leading international suppliers of connector systems and employs around 2,700 people worldwide. In addition to its company headquarters in Muehldorf a. Further production and product development sites are located in Sibiu / Romania, Shanghai / China, Tijuana / Mexico and Camarillo / USA. ODU combines all relevant areas of expertise and key technologies including design and development, machine tooling and special machine construction, molding, stamping, turning, surface engineering, assembly, and cable assembly. The ODU Group is represented globally with its products and has an international salesnetwork. These include our own sales companies in China, Denmark, Germany, France, Hong Kong, Italy, Japan, Korea, Austria, Sweden, the UK and the USA, as well as numerous global sales partners. Connectors from ODU ensure reliable transmission of power, signals, data and media in numerous demanding areas of application: in medical technology, military and security technology, automotive as well as in industrial electronics or measurement and testing technology.
