PRESS RELEASE

Muehldorf a. Inn, January 24, 2025

Enforce Tac 2025 - Trade fair preview

[Specialized connector system solutions for soldier wearables](#)

The modernization of soldier systems is in focus for many international armed forces. Driven by the pursuit of technical superiority, digitalization continues to gain ground and reinforces the need for a uniform standard. Connecting soldiers seamlessly enables efficient control of forces and contributes significantly to the success of a mission. The level of stress to which soldiers' systems are exposed in the field can only be estimated to a limited extent in advance.

Networked devices, portable electronics and miniaturization are presenting manufacturers with ever greater challenges in terms of weight, energy efficiency and interoperability. At the same time, volatile geopolitical developments and ethical issues require responsible and sustainable solutions.

ODU's specialized connector system solutions for military and security technology combine outstanding performance with **robustness** and **flexibility**. They enable the reliable connection of portable systems to PDUs and ensure precise data transmission - tailored to the needs of modern military and security forces. Miniaturized connectors - **ideal for use in portable communication systems or mobile optronics for environment and target detection**.

Let us convince you of the performance of our connection solutions at Enforce Tac 2025. From February 24 to 26, you will find us in **Hall 9, Stand 541**, where ODU experts will be available for discussions and individual advice.

We look forward to talking to you about the challenges and opportunities of the future. Together we create connections that make the difference - secure, reliable and future-oriented.

ODU Group: global representation with perfect connections

The ODU Group is one of the world's leading suppliers of connector systems, employing 2,700 people around the world. In addition to its company headquarters in Muehldorf a. Inn (Germany), ODU also has an international distribution network, production and product development sites in Sibiu / Romania, Shanghai / China, Tijuana / Mexico and Camarillo / USA. ODU combines all relevant areas of expertise and key technologies including design and development, machine tooling and special machine construction, injection, stamping, turning, surface technology, assembly and cable assembly. The ODU Group sells its products globally through its sales offices in Austria, China, Denmark, France, Germany, Hong Kong, Italy, Japan, Korea, Sweden, UK and the US, as well as through numerous international sales partners. ODU connectors ensure a reliable transmission of power, signals, data and media for a variety of demanding applications including medical technology, military and security, automotive, industrial electronics, and test and measurement.
